Embvue Releases New Test Suite for National Instruments Test Management Software

February 14, 2013

Embvue

Montreal, Quebec (RPRN) 02/14/13 — Embvue Inc. today announces Generator, a requirements-based automated functional testing suite designed to support National Instruments test management software, NI TestStand.The new tool suitecan help engineers implement an automated testing and quality management infrastructure, establish consistent, repeatable processes for automatically creating Test Cases & Test Procedures directly from requirements, generate output documents, and execute tests directly on the unit under test.

"Embvue worked with NI to ensure compatibility of Generator with NI TestStand, and we are thrilled to bring to market the powerful combination of Embvue's requirements-based testing approach with NI's exceptional test management software and extensive hardware test platforms" said Gary Greisman, CEO at Embvue. "Our customers will find significant value in the addition of NI TestStand support as it reinforces our principle of improving the quality of embedded systems while reducing the cost of integration, testing verification and certification of those systems."

Generator automates the testing, verification, validation and certification artifact creation activities for embedded systems. A free, thirty-day trial of the add-on software is available through both the Embvue website and the NI LabVIEW Tools Network

"The increased focus on high-reliability test solutions presents many challenges for test engineers across all industries - Generator stands to help NI's customers using TestStand mitigate the increased cost and effort associated with mission-critical test, and save them tremendous time and ultimately, money." – Jeff Meisel, LabVIEW Tools Network Manager

About Embvue

Embvue is an experienced, process-driven, systems and software engineering company specializing in the provision of products and services for customers developing complex, real time, mission or safety-critical embedded systems. Additional information about Embvue is available at www.embvue.com

About National Instruments

Since 1976, National Instruments www.ni.com has equipped engineers and scientists with tools that accelerate productivity, innovation and discovery. NI's graphical system design approach to engineering provides an integrated software and hardware platform that speeds the development of any system needing measurement and control. The company's long-term vision and focus on improving society through its technology supports the success of its customers, employees, suppliers and shareholders.

LabVIEW, National Instruments, NI, NI TestStand and ni.com are trademarks of National Instruments. Other product and company names listed are trademarks or trade names of their respective companies.
