

60% off online course on building an instantly updating website with jQuery and AJAX

August 28, 2013

GLOUCESTERSHIRE, UK

([RPRN](#)) 08/28/13 — Experienced online educator Dr Richard Stibbard of webinaction.co.uk is making available 200 places on his e-course for budding web developers at 60% off the normal price of US\$89 - that's just \$36 for over 130 lectures and 10 hours of

video content!

The course focusses on an important aspect of modern web development - the trend towards websites which work like desktop applications, reacting instantly to the user's choices without the need to wait for the page to reload.

You will be taken through the entire process of designing and developing such a website, from HTML5 page structure, through CSS styling, connecting to a database with PHP, using MySQL queries to manipulate the data in the database, updating the HTML on the fly with jQuery, and finally performing the database updates in the background with AJAX.

The course is highly accessible for anyone seeking to break into web development, teaching in easy, logical steps as the site is gradually built up. However, it is also carefully designed to be suitable for more advanced

learners as subjects you are already familiar with can be skipped, allowing you to concentrate on those just aspects you need to know about.

To access the course at this price, go to <https://www.udemy.com/build-an-instant-update-database-interface-with-jquery-ajax/?couponCode=RUSHPR36>
