

# Change Your Brain, Change Your Wealth

May 15, 2012

Dallas / Fort Worth, TX  
([rushPRnews](#)) 05/15/12 — Many of the world's most successfully driven business owners understand the importance of staying mentally sharp. Can nutrition play a role in success? We believe it does. You will soon discover that you can build your

own mental capacity and find success by first ingesting nutritional brain supplements.

These supplements, which vary from ginkgo biloba and omega 3-5-6-7-9 complex to apoaequorin (such as PrevaGen) and acetyl-L-carnitine (such as Neuro One), help you think more clearly, feel increasingly energized and have greater creativity and critical thinking abilities. The ingesting of mind-boosting supplements represents a new and innovative approach to help business owners build wealth and create the highest and best lifestyle solutions experience possible.

"The secret to success begins with increasing your mental abilities, and the best way to do this is to fully take advantage of the wide selection of outstanding brain supplements through your loyal retailers, suppliers, and manufacturers," said social capital advisor to advocates of small business owners, minority business owners, veterans business owners, women business owners and family business owners, Mr Davine Williams. "It's no wonder why some of the world's most successfully driven business owners

are known to take these supplements regularly."

There are a number of books out on this very topic, including "Mind Boosters: A Guide to Natural Supplements that Enhance Your Mind, Memory & Mood." In this book, author Dr. Ray Sahelian details 15 categories of substances that help combat specific illnesses, as well as supplement programs key to different age groups. Through both cited experts and the author's own professional experience, the book describes how business owners can enhance their own mental capacity and have increasing energy through a consistent and regular supplement routine.

Another book, "The Secret Language of Money: How to Make Smarter Financial Decisions and Live a Richer Life," by David Krueger, M.D at [www.mentorpath.com](http://www.mentorpath.com), amazingly entertains and gracefully introduces the psychology of mind mapping and chartering of accounts, the actual insight into how your brain implements the concept of money, the subconscious meanings you give money and the reasons you continue to make the same money-related behavioral mistakes. The book aims to help you find a balance between wealth, health and joy.

There's also "Guaranteed Millionaire: Using the Law to Protect Yourself and Make Money," with a free DVD or you can receive it right now at [www.legalees.com](http://www.legalees.com). This book focuses more on the practical side of accumulating and preserving your wealth, including protecting oneself from unfair taxes, frivolous lawsuits, divorce proceedings, illnesses and accidents.

"There are a lot of self-help books and experts out there who speak to either ingesting mind-enhancing supplements or achieving success in business or life," Mr. Williams said. "My goal and focus is helping motivated small business owners assemble "1% advisory team" to grow and monetize their business."
