

Free Ecourse For Teachers Who Want To Teach With Technology

May 21, 2013

**how to teach
with technology**

WASHINGTON, DC

([rushPRnews](#)) 05/21/13 —

Former Vice-Consul for

Education in Russia, Ms.

Kimberly Williams is giving

away 1000 ecourses for

educators interested in

teaching with technology.

[“How to Teach With Technology](#)

” is an on-demand professional development ecourse that students can access online or offline with their iPhone or iPad. It is a comprehensive guide to the process of designing and creating engaging products for classrooms or ecourses. Participants walk away with podcasts, screencasts, Slideshare presentations, animated movies, and an online gallery for in-person presentations or online lectures. This program also shows teachers how to redesign their PowerPoints, create Prezis, find free images, film and edit movies, develop basic websites, and expand their career options with the creation of an online “brand.” The course includes screencasts, which explain the entire development process from the first log-on to the completed product, and comes with plenty of action steps to get started.

“Many teachers have little time to work through an ocean of new online tools to see which programs will work with the unique needs of their students,” said instructor Williams. “*How to Teach With Technology* is filled with practical advice that is designed to work with a variety of systems while helping teachers integrate technology into their existing lesson plans.”

To access free resources and other tips on teaching with technology, visit <http://professionaldevelopmentplan.org>. To see a course snippet, please see video clip below. To get your free ecourse with 28 lectures and 6.5 hours of content, visit <https://www.udemy.com/how-to-teach-with-technology> and use the coupon code: Summer. Offer expires June 5, 2013 EST.

About Kimberly Williams

Instructor Kimberly Williams has designed and hosted dozens of workshops online, on campuses and at conferences for secondary school and university communities, training teachers and librarians on 21st Century Education, open source technology and processes for establishing distance learning, creating effective online curriculum and facilitating multi-national cultural exchange forums. In addition, she taught numerous master classes on website development and use of social media, virtual exhibits, podcasts, and other technology.
