

# Gametel announces support for Apple iOS devices

January 6, 2012

**Lund, Sweden ([RPRN](#)) 01/06/12  
— Wireless gaming peripheral now compatible with iPhone and iPad**

6th January 2012. Fructel, a gaming peripheral company, announces the Gametel now supports iOS devices. Previously

Gametel announces support for Apple iOS only compatible with Android devices

smartphone and tablets, the Bluetooth controller now

transforms your iPhone and iPad into portable games console, delivering a level of gameplay accuracy and immersion never experienced on Apple devices.

Compatible with Apple iPhone running iOS 4.0 or later and Apple iPad running iOS 3.2 or later, Gametel supports hundreds of arcade titles from the iCADE suite, including classics like Missile Commander, Asteroids, Centipede, Pong, Super Breakout, Lunar Lander and Warlords.

Alongside these retro titles, other selected iOS games, such as No Gravity,

Silverfish, Super Crossfire HD and Terra Noctis, are also available to download from Apple's iTunes App Store.

Bo Nyman, CEO of Fructel says: "Gametel has proved popular among Android users but we're pleased to bring support for the Apple iPhone and iPad. Now users can experience even more immersive gameplay using the Gametel's console-style controls – freeing the touchscreen from fingers."

Gametel connects to the device via Bluetooth while a built-in adjustable spring-loaded clamp allows secure docking of any Android handset and iPhone. Once paired the Gametel automatically connects to the device every time it is powered on.

With a familiar controller design, Gametel's D-pad, quartet of buttons and two shoulder triggers replicate console-style gaming controls; an impressive nine hour battery life provides more than enough playing time for long journeys and weekly commutes.
