

Northridge Pest Control Company Uses Safe, Effective Products to Keep Houses Bug-Free

August 26, 2013

Reseda , CA ([rushPRnews](#)) 08/26/13 — - Ensuring creatures like roaches, wasps and ants are banned from bedrooms and kitchens everywhere requires powerful products applied regularly and correctly. To safely keep homes insect-free, the Northridge pest control professionals at Facility Pest Control use high-quality and advanced insecticides that are proven to be safe for humans and pets once dried.

One of these insecticides is Suspend SC. This commonly used product contains Deltamethrin, an incredibly safe, stainless and odorless pesticide appropriate for interior applications where food is prepared. Suspend SC eliminates bedbugs, ants, roaches, termites, spiders and more by producing a barrier of clear residue that stands for up to 3 months. Suspend SC is even used to control pests around grain crops.

Insecticide Demand CS is Facility Pest Control's preferred method of protecting a home's exterior. This water-based insecticide packs a powerful kick against more than 30 types of insects. When applied around the perimeter of the house, Demand CS leaves thousands of micro-particles that cling to the exterior and ensure bugs stay out. It's even regarded to be 200 times more effective on flies and mosquitoes than other products. Despite its potency, however, this insecticide leaves little to no staining or odor.

If any of these products sound familiar, it's because multiple websites that promote the advantages of do-it-yourself pest control sell Demand CS and Suspend SC. Years of education and experience allows Facility Pest

Control's experts to apply insecticides correctly and safely. Attempting pest control or removal of bees without sufficient training and equipment can be hazardous, messy and less-effective. Direct contact with skin is dangerous.

Facility Pest Control is a family-owned company dedicated to communities across Southern California. Their courteous employees have earned the trust of businesses and residents with honest pricing, safe products and great results. For rodent control services, pest control and bee control in Woodland Hills and surrounding areas, give them a call today.
