

Ottawa Cosmetic Dentistry Helps Patients Achieve Gorgeous Valentine's Day Smiles

January 13, 2013

Ottawa, Ontario ([RPRN](#)) 01/13/13

— - [Ottawa cosmetic dentistry](#)

providers Drs. David Bartos and Mark Northcott help patients reach their full smile potential this Valentine's Day. There are certain cosmetic dental procedures that brighten smiles aside from general teeth cleaning.

Whitening Tooth whitening is a simple procedure that patients can undergo in one visit. Trillium Dental offers professional whitening in the office or at home to whiten at the patient's leisure. In the office the Zoom! whitening system lightens teeth up to nine shades with the special Zoom! gel and activating light. Patients will see immediate results with Zoom! in-office [Kanata teeth whitening](#), and results from at-home kits are noticeable in a week or two. Whiter teeth can boost a smile before a big Valentine's Day date.

Contouring

Some patients hide their smiles because of prevalent gums. [Orleans dentist](#), Bartos can contour a patient's gum line with laser technology. This procedure reveals more of the tooth and less of the gums.

Bonding

Smiles with slight flaws, such as stains, gaps or chips, can be improved with dental bonding. Bonding is quick, painless and perfect for covering up embarrassing aspects of the smile.

Aligning

While aesthetically straight teeth are attractive, straighter teeth also result in more effective brushing and flossing. Straight teeth are easier to clean than crooked teeth. Patients love the ease and flexibility of Invisalign and Invisalign Teen. Invisalign treatment lasts between a year and 18 months, and the removable aligners allow patients to straighten teeth without disrupting their lives. The aligners are made of clear plastic, and they are almost invisible. Patients can feel confident throughout their Invisalign treatment, and Invisalign won't interrupt their Valentine's Day plans.

Renovating

Cosmetic dentists at Trillium Dental offer [porcelain veneers](#) to overhaul the less-than-perfect smile. Veneers can improve smiles stunted by chipped or gapped teeth, discolored or stained teeth and crooked or irregular length teeth. Veneers are customized for each patient, and dentists ensure the veneers match the patient's overall look. It generally takes two office visits to complete the veneer process – one visit to mold the teeth and a second visit to apply the custom veneers.
