

Star Micronics Announce Latest Addition To Best-Selling Line Of Swiss Type Automatic Lathes

October 30, 2012

DERBY, UNITED KINGDOM
([RPRN](#)) 10/30/12 — Star Micronics GB, market leaders in the sales of sliding head lathes, have announced the latest version of their best-selling SR machine series. The new model, designated the SR-20R IV, made its debut at Star GB's open house

event this October. The SR medium-complex machine series was launched in 1992 and has constantly pushed the capabilities of [sliding head technology](#), with each version updating and improving to meet the needs of the market. Since its inception, the SR family of machines have been successfully integrated into engineering companies worldwide.

The [SR-20R IV introduces new features](#), including an improved Y-axis control function to facilitate a wide variety of complex machining

on the rear side and efficiently divide front-side and rear-side machining processes. It also has a fully programmable B-axis.

This improved functionality, coupled with the increased output of the power-driven tool motor and a 27-positioned tool station accommodating 41 tools, make the SR-20R IV the most advanced medium-complex machine yet from

Star.
