

# Sustainable, Renewable and Green Energy Solutions- From the Independent Specialist

November 9, 2012

Green Route Ltd

and [LED lighting](#). Alongside this, Greenroute offers a full range of support services including energy-efficiency training and carbon-neutral planting schemes.

In today's society demand for resources surge, prices increase and concerns about resource shortage rise. The Department of Energy and Climate Change's (DECC) recent overhaul in regulation and the launch of the Green Deal this autumn, demonstrate the Government's commitment to long-term energy efficiency.

With the Government's full support there has never been a better time to invest in renewable energy systems. Not only is it possible to reduce energy use, save money and cut carbon footprints, but valuable revenues can be earned from Government incentive schemes. [Both the Feed-In Tariff \(FIT\)](#) for electricity generation technologies and the [Renewable Heat Incentive \(RHI\)](#)

DERBY, UK ([RPRN](#)) 11/09/12 —

Greenroute Ltd is a private independent company offering complete renewable energy solutions for all types of domestic, agricultural, commercial and industrial property. Greenroute provides and installs everything from [solar PV systems](#) and [biomass boilers](#) to [heat pumps](#)

for heating systems, deliver a healthy ROI and go a long way towards offsetting the initial costs of renewable systems.

As an independent service provider; Greenroute can recommend renewable energy solutions from across the full spectrum of technologies available. This way Greenroute can offer the most competitive prices from their range of partners, ensuring value for money and suitability.

“We work with clients to understand their aims and to ultimately find a solution that's good for their bottom line, their brand, their reputation – whilst addressing corporate social responsibility”: James Miller, Managing Director of Greenroute Ltd.

Greenroute offers a professional energy audit of the business premises by a qualified and accredited surveyor. The findings of which, allow Greenroute to recommend the most effective renewable energy technologies and energy-management strategies for each client.

“For those that are enthused by renewable energy solutions, but find themselves confounded by the jargon that surrounds the subject; Greenroute can provide a specially targeted, succinct audit.” James Miller, Managing Director of Greenroute Ltd.

All Greenroute partners are approved, accredited and registered with the necessary national schemes to enable clients to claim [FIT and RHI payments](#). However, in circumstances where the client may not have initial capital funds they can choose to take advantage of two additional funding options offered by Greenroute, including a capital pay back plan and a lease arrangement.

Through a capital pay back plan Greenroute can provide up to 100% funding, to be paid back over an agreed period. Once the loan is paid back, the client takes full ownership of the system. The monthly or quarterly payments are less than the savings making this an excellent purchase vehicle.

Greenroute are proud to help businesses achieve significant savings in

energy consumption and costs, reduce their carbon emissions, and enhance the overall image of their business.
