"I want to keep my finances in shape. Paper is ancient. Most online banks offer a user experience as pleasant as a colonoscopy. Then there's services which try to sell you credit cards that you don't need. Toshl Finance is on the consumer's side. Making your finances work for you " said Matic Bitenc the CEO of Toshl, adding "Plus it works everywhere, you don't need a US bank account to use it."

Toshl Finance is used by hundreds of thousands of people worldwide and in multiple currencies. People using the Toshl apps all over the world can be seen in real time on www.toshl.com/live

What's new - The new Toshl Finance 1.7 adds a plethora of new features while keeping everything simple and easy to understand.

Sum up - Your most important financial info, easy to get, on one screen, explained by a cute monster. Boom!

Planning - Plan for the future. Display upcoming expenses separately and schedule automatic payments for recurrent bills.

Incomes - Note down incomes, balance with expenses and see how you're doing.

Better budgets

-Budgets remind you of how quickly your spending is progressing during the week, month or year. You can even be hardcore about it and set up a budget for... let's say only alcohol expenses. In the (unlikely) event of leftover funds, they can simply be moved to the next budget. Cheers!
