

# We introduce Alke's electric vehicles for beaches

July 2, 2013

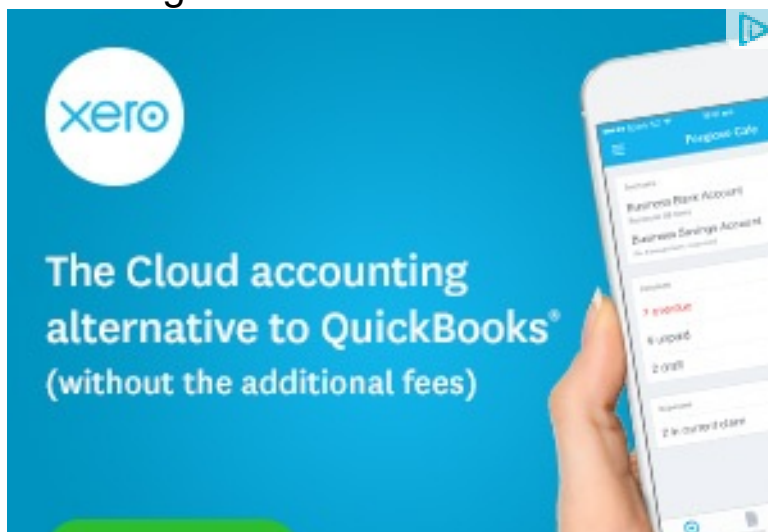

**Padova- Italy ([RPRN](#)) 07/02/13**  
**— Among electric vehicles for the beach, the Alke's means have superior performance.**

Alke's Electric vehicles have unmatched performance, they can also be used in villages along the coast and especially also on the beaches, in such situation we

happened to see customers observe the electrical machinery Alke move on the sand without difficulty.

Electric vehicles are used to carry luggage on the beach, to move chairs, umbrellas campsites and holiday parks with access to the sea.

The collection of waste is a reality in almost all of Europe. Increasingly along the coasts of seas we see vehicles for the cleaning of beaches and vehicles for ecological services.

The electrical means ATX200E with supergates are suitable for this purpose: empty baskets and carry out the collection of waste. The vehicles Alke ATX and ATX 100E 200E instead are particularly suitable for the transport of umbrellas, sun beds and transport in general as multi-purpose vehicles suitable for the maintenance in many different areas.

Features ATX200E:

100% electric version

Maximum power 17.5 kW

Autonomy in optimal conditions of employment with about 70 Km, is certainly one of the electric vehicles that have greater autonomy.

Load capacity 530 kg

Very robust frame structure that is derived from a 4x4 vehicle.

Towing capacity of 2000 kg.
